ELSEVIER

International Journal of Mass Spectrometry 232 (2004) 321–324

International Journal of Mass Spectrometry

www.elsevier.com/locate/ijms

Subject index Volume 232

Ab initio
Theoretical characterizations of novel $C_2H_5O^+$ reactions, 17
Ab initio calculations
Gas phase nitrosation of substituted benzenes, 31
Accuracy
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205
Accurate mass
A fragmentation study of an isoflavone glycoside, genistein-7-*O*-glucoside, using electrospray quadrupole time-of-flight mass spectrometry at high mass resolution, 171
Alkali metal
Intracluster cyclization reaction producing a benzene derivative: photoionization mass spectrometric study of alkali metal–methyl propiolate clusters, 41
2-Aminobenzamide
Nano-scale liquid chromatography-mass spectrometry of 2-aminobenzamide-labeled oligosaccharides at low femtomole sensitivity, 51
Ammonia
Gas-phase ion chemistry of the propyne/ammonia and silane/propyne/ammonia systems, 139
5- and 6-CIU
Electron impact ionization of 5- and 6-chlorouracil: appearance energies, 99
Anti-malarial drug
Fast atom bombardment mass spectral analysis of three new oxidative products of primaquine, 151
Appearance energy
Electron impact ionization of 5- and 6-chlorouracil: appearance energies, 99
Dissociative electron impact ionization of N_2O_5, 147
Aromatic
The effect of ozone in positive ion mode ion mobility spectrometry, 95
Atmospheric pressure ionization
Atmospheric pressure ionization and gas phase ion mobility studies of isomeric dihalogenated benzenes using different ionization techniques, 117

Benzene
The effect of ozone in positive ion mode ion mobility spectrometry, 95
Binary cluster anions
A density functional study of the structures and energies of $C_nP_5^-$ (n = 1–7) clusters, 165
Binding energies
Blackbody infrared radiative dissociation at low temperature: hydration of $X^{2+}(H_2O)_n$, for X = Mg, Ca, 59
BIRD
Blackbody infrared radiative dissociation at low temperature: hydration of $X^{2+}(H_2O)_n$, for X = Mg, Ca, 59
Bond enthalpies
Gas-phase clustering reactions of NO_2^-, $C_2H_3NO_2^-$, $C_2H_4NO_2^-$, $C_2H_5NO_2^-$ and $C_2H_5NO_4^-$ with $C_2H_5NO_2$, 185
Branching ratio
Isomer effect in the branching ratio of anions for thermal electron attachment to chlorinated phenols, 265
Branching ratios for the dissociative recombination of hydrocarbon ions. II. The cases of $C_4H_n^+$ (n = 1–9), 195

Carbocation stability
The fragmentation mechanism of five-membered lactones by electrospray ionisation tandem mass spectrometry, 271
Carminic acid
Matrix-assisted laser desorption and electrospray ionization mass spectrometry of carminic acid isolated from cochineal, 225
Catenanes
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249
Cavity ring down spectroscopy
Mass spectrometric and laser spectroscopic characterization of a supersonic planar plasma expansion, 25
Charge separation processes
Ruthenium diimine complexes in unusual charge states formed in collisional electron transfer, 79
Charge transfer
Surface impact induced fragmentation and charging of neat and mixed clusters of SO_2 and H_2O, 1
Chemical ionization
Gas phase nitrosation of substituted benzenes, 31
Chlorinated phenol
Isomer effect in the branching ratio of anions for thermal electron attachment to chlorinated phenols, 265
Chlorine position
Mass spectrometric elucidation of chlorine location in dichloro fatty acids following 4,4-dimethyloxazoline derivatization, and its application to chlorinated fatty acids in fish, 127
$C_2H_5O^+$
Theoretical characterizations of novel $C_2H_5O^+$ reactions, 17
Cluster ions
Gas-phase clustering reactions of NO_2^-, $C_2H_3NO_2^-$, $C_2H_4NO_2^-$, $C_2H_5NO_2^-$ and $C_2H_5NO_4^-$ with $C_2H_5NO_2$, 185
Cluster impact
Surface impact induced fragmentation and charging of neat and mixed clusters of SO_2 and H_2O, 1
Cluster ions thermodynamics
Kinetics, thermodynamics, and ab initio calculations of $HS_2O_7^-(H_2SO_4)_x$ (x = 1–3) cluster ions, 9
Cochineal
Matrix-assisted laser desorption and electrospray ionization mass spectrometry of carminic acid isolated from cochineal, 225
Collisional activation
Gas phase nitrosation of substituted benzenes, 31
Collision-induced dissociation
Tandem mass spectrometry study of protonated methanol–water aggregates, 67
Generation and characterization of ionic and neutral selenocumulene $HC_3Se^{+/}$ by tandem mass spectrometry and computational study, 231
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249
Computational chemistry
Generation and characterization of ionic and neutral selenocumulene $HC_3Se^{+/}$ by tandem mass spectrometry and computational study, 231
Corona discharge
The effect of ozone in positive ion mode ion mobility spectrometry, 95

doi:10.1016/S1387-3806(04)00138-1

$C_nP_5^-$
A density functional study of the structures and energies of $C_nP_5^-$ (n = 1–7) clusters, 165
Cyclization
Intracluster cyclization reaction producing a benzene derivative: photoionization mass spectrometric study of alkali metal–methyl propiolate clusters, 41

Density functional study
A density functional study of the structures and energies of $C_nP_5^-$ (n = 1–7) clusters, 165
Dichloro fatty acid
Mass spectrometric elucidation of chlorine location in dichloro fatty acids following 4,4-dimethyloxazoline derivatization, and its application to chlorinated fatty acids in fish, 127
Dihalogenated benzenes
Atmospheric pressure ionization and gas phase ion mobility studies of isomeric dihalogenated benzenes using different ionization techniques, 117
Dinitrogen pentoxide
Dissociative electron impact ionization of N_2O_5, 147
Dissociation
Blackbody infrared radiative dissociation at low temperature: hydration of $X^{2+}(H_2O)_n$, for X = Mg, Ca, 59
Dissociative recombination
Branching ratios for the dissociative recombination of hydrocarbon ions. II. The cases of $C_4H_n^+$ (n = 1–9), 195
DMOX derivatization
Mass spectrometric elucidation of chlorine location in dichloro fatty acids following 4,4-dimethyloxazoline derivatization, and its application to chlorinated fatty acids in fish, 127

EIMS
Mass spectrometric elucidation of chlorine location in dichloro fatty acids following 4,4-dimethyloxazoline derivatization, and its application to chlorinated fatty acids in fish, 127
Electron affinity
Isomer effect in the branching ratio of anions for thermal electron attachment to chlorinated phenols, 265
Electron impact ionization
Electron impact ionization of 5- and 6-chlorouracil: appearance energies, 99
Electron ionization
Dissociative electron impact ionization of N_2O_5, 147
Electron transfer
Ruthenium diimine complexes in unusual charge states formed in collisional electron transfer, 79
Electrospray ionisation-collision induced dissociation/mass spectrometry (ESI-CID/MS)
Fragmentation pattern of regioselectively *O*-methylated maltooligosaccharides in electrospray ionisation-mass spectrometry/collision induced dissociation, 107
Electrospray ionization
A fragmentation study of an isoflavone glycoside, genistein-7-*O*-glucoside, using electrospray quadrupole time-of-flight mass spectrometry at high mass resolution, 171
Matrix-assisted laser desorption and electrospray ionization mass spectrometry of carminic acid isolated from cochineal, 225
Electrospray mass spectrometry
The fragmentation mechanism of five-membered lactones by electrospray ionisation tandem mass spectrometry, 271
Elimination reactions
Theoretical characterizations of novel $C_2H_5O^+$ reactions, 17
Environmental samples
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205

ESI/MS″ spectra
ESI/MS″ in the structural characterisation of some nitrido-Re heterocomplexes, 239

FAB mass spectrometry
Fast atom bombardment mass spectral analysis of three new oxidative products of primaquine, 151
Flavonoid glycoside
A fragmentation study of an isoflavone glycoside, genistein-7-*O*-glucoside, using electrospray quadrupole time-of-flight mass spectrometry at high mass resolution, 171
Fragmentation mechanism
The fragmentation mechanism of five-membered lactones by electrospray ionisation tandem mass spectrometry, 271

Gas-phase enantioselectivity
Enantioselectivity in gas-phase ion–molecule reactions, 277
Gas-phase equilibria
Gas-phase clustering reactions of NO_2^-, $C_2H_3NO_2^-$, $C_2H_4NO_2^-$, $C_2H_5NO_2^-$ and $C_2H_5NO_4^-$ with $C_2H_5NO_2$, 185
Genistein-7-*O*-glucoside
A fragmentation study of an isoflavone glycoside, genistein-7-*O*-glucoside, using electrospray quadrupole time-of-flight mass spectrometry at high mass resolution, 171
Glucose units
Nano-scale liquid chromatography-mass spectrometry of 2-aminobenzamide-labeled oligosaccharides at low femtomole sensitivity 51

High-pressure mass spectrometer
Gas-phase clustering reactions of NO_2^-, $C_2H_3NO_2^-$, $C_2H_4NO_2^-$, $C_2H_5NO_2^-$ and $C_2H_5NO_4^-$ with $C_2H_5NO_2$, 185
Hydration
Blackbody infrared radiative dissociation at low temperature: hydration of $X^{2+}(H_2O)_n$, for X = Mg, Ca, 59
Hypervalent ions
Theoretical characterizations of novel $C_2H_5O^+$ reactions, 17

IMS
The effect of ozone in positive ion mode ion mobility spectrometry 95
In vitro
Fast atom bombardment mass spectral analysis of three new oxidative products of primaquine, 151
In vivo
Fast atom bombardment mass spectral analysis of three new oxidative products of primaquine, 151
Inductively coupled plasma mass spectrometry
Determination of Pu in urine at ultratrace level by sector field inductively coupled plasma mass spectrometry, 217
Intracluster reaction
Intracluster cyclization reaction producing a benzene derivative: photoionization mass spectrometric study of alkali metal–methyl propiolate clusters, 41
Intrinsic reaction coordinates
Theoretical characterizations of novel $C_2H_5O^+$ reactions, 17
Ion mobility spectrometry
Atmospheric pressure ionization and gas phase ion mobility studies of isomeric dihalogenated benzenes using different ionization techniques, 117
Ion trap
Nano-scale liquid chromatography-mass spectrometry of 2-aminobenzamide-labeled oligosaccharides at low femtomole sensitivity 51
Ion trap mass spectrometry
Gas-phase ion chemistry of the propyne/ammonia and silane/propyne/ammonia systems, 139

Ion–molecule reaction
Gas phase nitrosation of substituted benzenes, 31
The effect of ozone in positive ion mode ion mobility spectrometry, 95
Ion–neutral complexes
Theoretical characterizations of novel $C_2H_5O^+$ reactions, 17
Isomer effect
Isomer effect in the branching ratio of anions for thermal electron attachment to chlorinated phenols, 265
Isomers
Branching ratios for the dissociative recombination of hydrocarbon ions. II. The cases of $C_4H_n^+$ (n = 1–9), 195

Keyhole limpet hemocyanin
Nano-scale liquid chromatography-mass spectrometry of 2-aminobenzamide-labeled oligosaccharides at low femtomole sensitivity, 51
Kinetic energy release
Ruthenium diimine complexes in unusual charge states formed in collisional electron transfer, 79
Knots
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249

Lactones
The fragmentation mechanism of five-membered lactones by electrospray ionisation tandem mass spectrometry, 271
Lipid analysis
Mass spectrometric elucidation of chlorine location in dichloro fatty acids following 4,4-dimethyloxazoline derivatization, and its application to chlorinated fatty acids in fish, 127

Macrocycles
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249
Mass bias
The effect of instrumental mass bias on $\delta^{11}B$ measurements: a comparison between thermal ionisation mass spectrometry and multiple-collector ICP-MS, 259
Mass spectra
Electron impact ionization of 5- and 6-chlorouracil: appearance energies, 99
Mass spectrometry
Atmospheric pressure ionization and gas phase ion mobility studies of isomeric dihalogenated benzenes using different ionization techniques, 117
Dissociative electron impact ionization of N_2O_5, 147
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249
Enantioselectivity in gas-phase ion–molecule reactions, 277
Matrix effect
Fast atom bombardment mass spectral analysis of three new oxidative products of primaquine, 151
Matrix separation
Determination of Pu in urine at ultratrace level by sector field inductively coupled plasma mass spectrometry, 217
Matrix-assisted laser desorption
Matrix-assisted laser desorption and electrospray ionization mass spectrometry of carminic acid isolated from cochineal, 225
MC-ICPMS
Application of MC-ICPMS to the precise determination of tellurium isotope compositions in chondrites, iron meteorites and sulfides, 83
MC-ICP-MS
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205
Mechanism of daughter ion formation
Fragmentation pattern of regioselectively *O*-methylated maltooligosaccharides in electrospray ionisation-mass spectrometry/collision induced dissociation, 107
Metal ion complexes
Ruthenium diimine complexes in unusual charge states formed in collisional electron transfer, 79
Metal ions
Blackbody infrared radiative dissociation at low temperature: hydration of $X^{2+}(H_2O)_n$, for X = Mg, Ca, 59
Meteorites
Application of MC-ICPMS to the precise determination of tellurium isotope compositions in chondrites, iron meteorites and sulfides, 83
O-Methyl-β-cyclodextrins
Fragmentation pattern of regioselectively *O*-methylated maltooligosaccharides in electrospray ionisation-mass spectrometry/collision induced dissociation, 107
Molecular ions
Mass spectrometric and laser spectroscopic characterization of a supersonic planar plasma expansion, 25
Molecular clusters
Surface impact induced fragmentation and charging of neat and mixed clusters of SO_2 and H_2O, 1
Multiple-collector ICP-MS
The effect of instrumental mass bias on $\delta^{11}B$ measurements: a comparison between thermal ionisation mass spectrometry and multiple-collector ICP-MS, 259

Negative chemical ionization
Isomer effect in the branching ratio of anions for thermal electron attachment to chlorinated phenols, 265
Neutralization–reionization
Gas phase nitrosation of substituted benzenes, 31
Generation and characterization of ionic and neutral selenocumulene $HC_3Se^{+/\cdot}$ by tandem mass spectrometry and computational study 231
N-Glycans
Nano-scale liquid chromatography-mass spectrometry of 2-aminobenzamide-labeled oligosaccharides at low femtomole sensitivity 51
Nitrido-Re heterocomplexes
ESI/MS^n in the structural characterisation of some nitrido-Re heterocomplexes, 239
Non-covalent complexes
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249
Noncovalent interactions
Enantioselectivity in gas-phase ion–molecule reactions, 277

Pb isotope ratios
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205
Phosphorus-doped carbon clusters
A density functional study of the structures and energies of $C_nP_5^-$ (n = 1–7) clusters, 165
Photoionization
Intracluster cyclization reaction producing a benzene derivative: photoionization mass spectrometric study of alkali metal–methyl propiolate clusters, 41
Planar plasma expansion
Mass spectrometric and laser spectroscopic characterization of a supersonic planar plasma expansion, 25
Plutonium
Determination of Pu in urine at ultratrace level by sector field inductively coupled plasma mass spectrometry, 217
Polymerization
Intracluster cyclization reaction producing a benzene derivative: photoionization mass spectrometric study of alkali metal–methyl propiolate clusters, 41

Precision
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205
Propyne
Gas-phase ion chemistry of the propyne/ammonia and silane/propyne/ammonia systems, 139
Protonated benzenes
Gas phase nitrosation of substituted benzenes, 31
Pyrosulfuric acid
Kinetics, thermodynamics, and ab initio calculations of $HS_2O_7^-(H_2SO_4)_x$ ($x = 1$–3) cluster ions, 9

Radiolysis
Enantioselectivity in gas-phase ion–molecule reactions, 277
Regioselectively *O*-methylated maltooligosaccharides
Fragmentation pattern of regioselectively *O*-methylated maltooligosaccharides in electrospray ionisation-mass spectrometry/collision induced dissociation, 107
Rotaxanes
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249

Sample preparation
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205
Selenocumulene
Generation and characterization of ionic and neutral selenocumulene $HC_3Se^{+/\cdot}$ by tandem mass spectrometry and computational study 231
Silane
Gas-phase ion chemistry of the propyne/ammonia and silane/propyne/ammonia systems, 139
Source assessment
Accurate and precise Pb isotope ratio measurements in environmental samples by MC-ICP-MS, 205
Structural characterisation
ESI/MS^n in the structural characterisation of some nitrido-Re heterocomplexes, 239
Sulfur trioxide
Kinetics, thermodynamics, and ab initio calculations of $HS_2O_7^-(H_2SO_4)_x$ ($x = 1$–3) cluster ions, 9
Sulfuric acid
Kinetics, thermodynamics, and ab initio calculations of $HS_2O_7^-(H_2SO_4)_x$ ($x = 1$–3) cluster ions, 9
Supramolecular chemistry
Mass spectrometric evidence for catenanes and rotaxanes from negative-ESI FT-ICR tandem-MS-experiments, 249

Tandem mass spectrometry
A fragmentation study of an isoflavone glycoside, genistein-7-*O*-glucoside, using electrospray quadrupole time-of-flight mass spectrometry at high mass resolution, 171
Tellurium isotopes
Application of MC-ICPMS to the precise determination of tellurium isotope compositions in chondrites, iron meteorites and sulfides, 83
Temperature dependence
Isomer effect in the branching ratio of anions for thermal electron attachment to chlorinated phenols, 265
Time-of-flight mass spectrometry
Mass spectrometric and laser spectroscopic characterization of a supersonic planar plasma expansion, 25
TIMS
The effect of instrumental mass bias on $\delta^{11}B$ measurements: a comparison between thermal ionisation mass spectrometry and multiple-collector ICP-MS, 259
Triple quadrupole
Tandem mass spectrometry study of protonated methanol–water aggregates, 67

Urine
Determination of Pu in urine at ultratrace level by sector field inductively coupled plasma mass spectrometry, 217

Water–methanol clusters
Tandem mass spectrometry study of protonated methanol–water aggregates, 67
